

WE RAISE THE FUTURE OF
AGRICULTURE AND THE
FUTURE OF OUR LIVES

An aerial photograph of a large agricultural field during sunset. Several yellow combine harvesters are visible, moving across the field and leaving trails of harvested grain. The sky is filled with warm, golden light, and the overall scene conveys a sense of industriousness and productivity in agriculture.

BAFICO

**PROVIDES
THEM,**
OUR MISSION
IN
AGRICULTURE.

WE HAVE BEEN GRAIN BROKER SINCE 1957. AN ENTIRE LIFETIME DEVOTED TO DELIVERING GRAINS, BY- PRODUCTS (FLOURS, EXPELLERS, PELLETS AND OILS), PULSE AND PSEUDO GRAINS. A LIFETIME SUPPORTING OUR PROVIDERS WITH CONSTANT ADVICE, OFFERING DIFFERENT POSSIBILITIES TO PLACE THEIR CROPS, THIS GIVES US A CHANCE TO CATER FOR ALL KINDS OF LOCAL CONSUMERS AND MULTINATIONAL COMPANIES OFFERING OUR PRODUCTS WORLDWIDE.

The reason for having stayed in the agricultural sector for so long, can be summed up in two virtues:

“professional responsibility” to manage third-party goods, and “a knack for innovation”, We have always come to these virtues when facing different situations along our career (droughts, floods, different types of impacts in our area, big companies no longer in the business, changing governments, different laws and other type of situations).

Life itself develops, and BAFICO keeps growing and dreaming, along those who always reinforce their trust in our company.

We work with the highest efficiency levels and set new quality standards, bringing in the most advanced technologies. We are committed to our constant growth by investing in efficient structures, both locally and internationally. Our network of storing centers is in constant growth, bringing our costumers closer, providing them with solutions and services that are designed to add value to their productions.

Our biggest priority is to build a solid relationship with our customers, We believe this is the way, in which the function and added value of each and every link in the chain provides a positive atmosphere in the distribution network.

At BAFICO S.A. we believe it is important to give back to the community a responsible contribution. We are committed with the communities we serve and together we work in social projects aimed at improving children's health and education. We are a "green company" interested and concerned with the proper conservation and optimum care of our environment.

A close-up photograph of a large pile of various lentils and beans. The lentils are sorted into distinct color groups: yellow, black, green, orange, and red. A wooden bowl, partially filled with yellow lentils, is tipped over, spilling the contents onto the pile. CONCEPT

“No matter how urban our life is, our bodies live on agriculture; we all come from Earth and to Earth we will return, - so we are in agriculture as much as we are in our own flesh.”
